SUNSET

A Quiet Crisis in Hospice Care

Caregivers spend more time on paperwork than at the bedside — and patient stories slip through the cracks.

1.7M

Americans
receive
hospice care
each year

60%

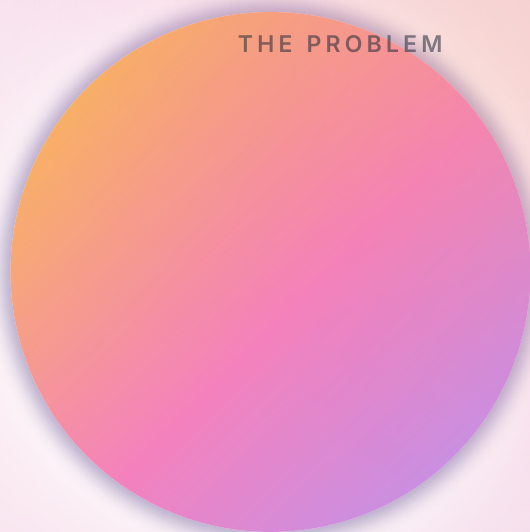

of clinician time
goes to
documentation

THE PROBLEM

SUNSET

WHO IT'S FOR

Built for the people closest to care

From the agencies that run hospice programs to the families holding hands at the bedside — Sunset meets each one where they are.

OPERATORS

Hospice Agencies

Run compliant programs without drowning in paperwork.

5,300+ certified hospices in the U.S.

BEDSIDE

Clinicians & Aides

Spend less time on charting, more time at the bedside.

130k+ hospice nurses, social workers & chaplains.

AT HOME

Patients & Families

A clear, gentle window into a loved one's care plan.

1.7M patients & their circles each year.

SUNSET

AI that drafts, organizes, and stays local.

From admission to family update,
Sunset handles the work that comes
between caregivers and care.

THE SOLUTION

01

AI-Drafted Notes

Structured clinical notes generated from existing records in seconds.

02

Local AI by Default

Ollama-powered LLMs run on the agency's own hardware via MCP — PHI never touches a third-party API.

03

Row-Level Security

Postgres RLS scopes every record to the right role — clinician, family, agency admin — at the database layer.

04

Family Portal

A gentle, private window for the people who love them most.

SUNSET

Early signals, real momentum.

36 hours from idea to working demo — and a dozen conversations with the people we'll serve.

TRACTION

36h

Built & demoable

From blank repo to running on a clinician's laptop.

12

User interviews

With nurses, social workers & family caregivers.

3

Pilot conversations

With Bay Area hospice agencies actively recruiting.

100%

Local

Patient data stays on the agency's machine. Always.

"It would give me back the part of nursing I actually love — being with patients, not the laptop."
